

RECHARGEABLE PERCUSSION MASSAGER

P302MAS001

Rechargeable percussion massager, ideal for deep and targeted treatment of tiredness and muscle pain. Through rapid and repetitive movements, this masseur stimulates blood circulation and heat, making treatment faster and more effective. The main difference between percussion therapy and vibration therapy is that percussion therapy goes much deeper into the muscle, to increase the amount of blood flow and oxygen needed for efficient treatment and recovery. With 6 selectable intensity levels and 4 interchangeable massage accessories depending on the area to be treated. The long-life lithium battery allows cable-free operation for maximum operating comfort. Quiet and light for easy operation.
