ARM BLOOD PRESSURE MONITOR

P303MED100

Monitor your blood pressure easily and reliably with the Beper upper-arm blood pressure monitor, designed for accurate and immediate readings.

Thanks to the simultaneous display of systolic and diastolic blood pressure and heart rate, it provides a comprehensive and clear reading at a glance. The device also alerts you to any irregular heartbeats, helping you to monitor your health.

The backlit display ensures optimal visibility in all circumstances, whilst the WHO indicator allows you to easily interpret the measured values according to international standards.

Equipped with a memory capacity of up to 150 measurements, each with the date and time, it allows you to track your progress over time. The ergonomic cuff ensures comfort and accuracy during use, whilst the automatic switch-off helps to optimise power consumption.

It runs on batteries or via a USB-C cable (not included) and comes with a carrying case, ideal for taking it with you wherever you go.

ARM BLOOD PRESSURE MONITOR
