The Beper carbon parabolic heater is designed to provide rapid and even heating, ideal for any room in the home.

Thanks to carbon technology, it generates comfortable radiant heat that spreads naturally. The automatic horizontal oscillation ensures the heat is distributed evenly, enhancing comfort in the room.

Featuring two selectable power settings, it allows you to easily adjust the heat intensity, whilst the timer, set for up to 60 minutes, ensures convenience and control in everyday use.

The adjustable height of up to 124 cm and the stable round base ensure maximum adaptability and safety. The 40 cm protective grille and the automatic shut-off system in the event of a fall make the product reliable for domestic use.

A practical and efficient solution for heating your spaces with ease.
