The Beper carbon parabolic heater is designed to provide rapid, even and efficient heating in the home.

Thanks to its carbon technology, it emits a pleasant and immediate radiant heat, ideal for the coldest days. The two selectable power settings allow you to easily adjust the heat output to suit your needs.

The automatic horizontal oscillation and adjustable vertical tilt promote a more even distribution of heat throughout the room, enhancing comfort during use.

Designed to offer maximum safety, it features an automatic shut-off function should it tip over and a 40 cm protective grille. The highly stable square base ensures secure and reliable support.

Compact, practical and easy to position, it is the ideal solution for quick and comfortable home heating.
